INTRODUCTION

The 1994 LOUISIANA TRAFFIC RECORDS DATA REPORT, represents an important element of Louisiana's traffic safety program. The exact nature of this data is aimed at assisting the various professionals involved in traffic safety by presenting to them where they can best concentrate their safety efforts.

This report is a valuable resource for news media, legislators, medical personnel, researchers, law enforcement agencies, judicial, personnel, insurance companies, businesses, students and persons involved in traffic safety activities. Through careful analysis of this data, relevant information can be learned about crashes, vehicles, drivers and roadways. Solutions can be found -- laws can be introduced, safety programs can be implemented, highway improvements can be made and enforcement can be increased.

When analyzing a particular table or chart it is important to note whether referencing the number of crashes, the number of people or the number of vehicles.

Data are obtained either directly from an item on the Accident Report or by interpreting the information provided in the report through reviewing the crash diagram, the Officer's written summary of the crash, or combinations of variables on the Accident Report. Because of this interpretation, and because the police officer may not have entered some item of information or provide complete information, data can be missing.

Thus, the tables produced in this report may differ from the true values because of missing information or recording errors. The missing information is mentioned in the tables.

Requests for further information or additional copies of this report should be addressed to

Department of Public Safety & Corrections

Fatal Passenger Car Crashes		626	
Fatal Light Truck Crashes		315	
Fatal Freight Transport Crashes		135	

Fatalities and Contributing Factors

Alcohol, Speed or Seat Belt Not Used

- In 1994, Louisiana had 844 traffic fatality victims.
- 68% of occupants did not wear a seat belt.
- Speed was a factor 29% of the time.
- Alcohol was a factor 45% of the time.
- 81% (683) of the time, alcohol or speed or no seat belt was a factor.
- Only 17% of the drivers killed had been identified to be wearing a seat belt.
- 26% of fatal passengers did wear a seat belt.
- The odds for a driver to be killed in an accident when not wearing a seatbelt were 1 in 57.
- When wearing a seat belt the odds for a driver to be killed were 1 in 2110.

Facts About Alcohol and Speed *

- Even at BACs as low as 0.02 percent, alcohol affects driving ability and crash likelihood.
- The probability of a crash begins to increase significantly at 0.05 percent BAC and climbs rapidly after about 0.08 percent.
- For drivers with BACs above 0.15 percent on weekend nights, the likelihood of being killed in a single vehicle crash is more than 380 times higher than it is for non-drinking drivers.
- NHTSA estimates that 941 lives were saved in 1991 by age 21 drinking laws.
- Since 1982, it is estimated that almost 8,743 lives have been saved in the affected ages by these laws.
- However, young people under age 21 are still greatly overrepresented in alcohol-related crashes and fatalities.
- Recent research indicates that the relative fatality risk for drivers in single vehicle crashes with BACs between 0.05 and 0.09 is more than 11 times greater than for drivers with a zero BAC.
- A BAC level of 0.08 means about four drinks within one hour on an empty stomach for an average male weighing 160 pounds.
- Any impairment, regardless of the BAC, can result in an arrest.
- Lap and shoulder belts, when used, are the single most effective means for occupants to reduce the risk of death and serious injury in a highway crash.
- In 1992, if every front seat occupant had buckled up, more than 14,000 deaths and several hundred thousand serious injuries nationally would have been prevented by seat belt use.
- The fatalities and injuries that are prevented by safety belt use laws result in significant economic savings to society. In 1990, at a usage rate of about 50%, the societal savings were estimated to be \$3.5 billion.
- One study pointed out that for persons hospitalized as a result of a traffic crash, their first year medical costs alone totaled nearly \$6.5 billion. Nearly one third of these costs were borne by the government.
- The cost to society of injured crash survivors is 2.2 times more than for fatalities.

* Percent alcohol related fatalities of Parishes with 5 or more fatalities

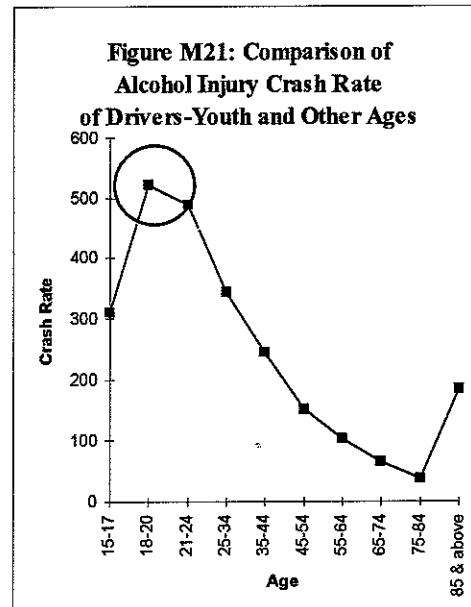

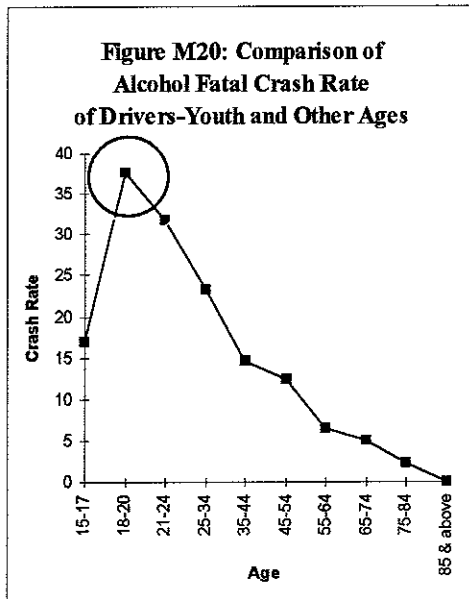

Age

- The fatal crash rate is high for the age groups 15-17 and 18-20 and declines thereafter; it increases again for drivers older than 84 (Fig. G3).
- The injury crash rate is highest for 15 to 17-year-old drivers (Fig. G4).
- The fatality rate of drivers (between 15 and 74) is highest for 18 to 20 year old drivers (Fig. M6).
- The fatal crash rate of youth (15-17 & 18-20) increases significantly on week ends (Fig. E8)

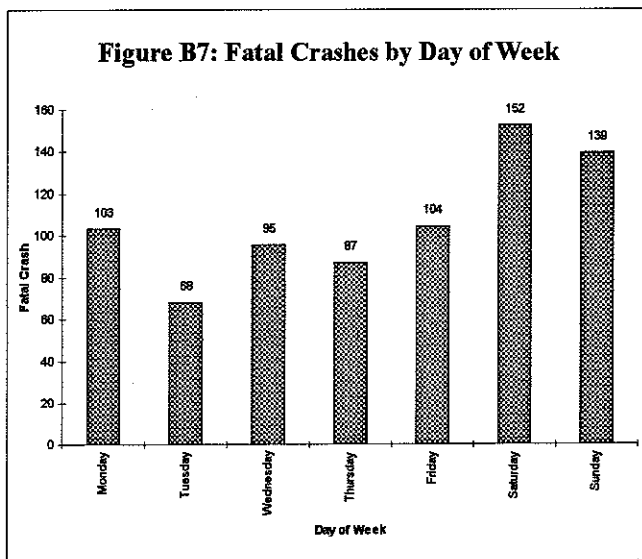

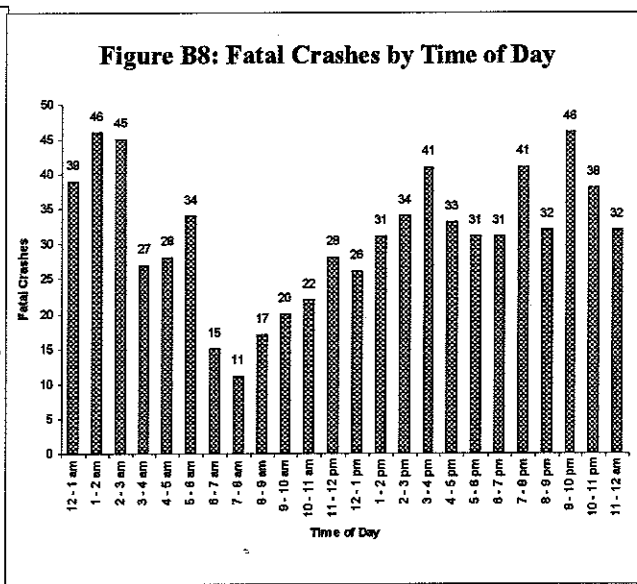

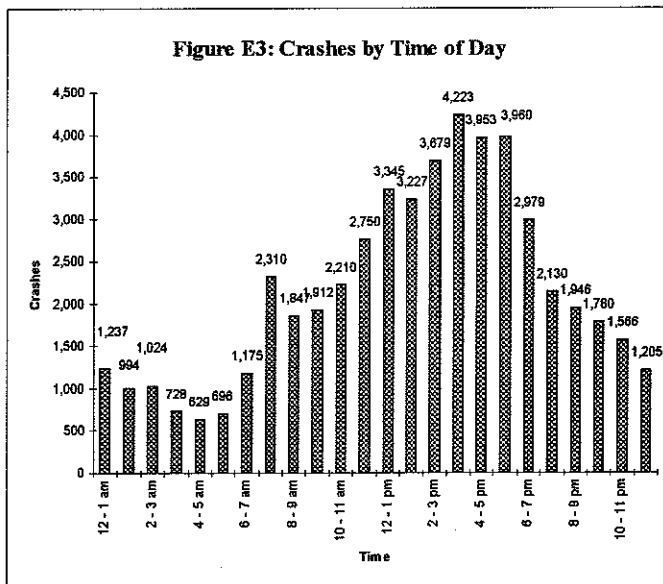

Alcohol and Age

- The alcohol-related fatal crash rate is highest for 18 to 20 year old drivers (Fig. M20)
- The alcohol related injury crash rate is highest for 18 to 20 year old drivers (Fig. M21)

Time of Accidents

- The number of injury accidents is lowest between the early morning hours and peaks during rush hours in the afternoon (between 2pm and 6pm) (Fig. E3).
- The number of fatal crashes are highest during the evening and early morning hours (Fig. B8).
- The fatal crash rate is highest on Friday and Saturday nights (Fig. B7).

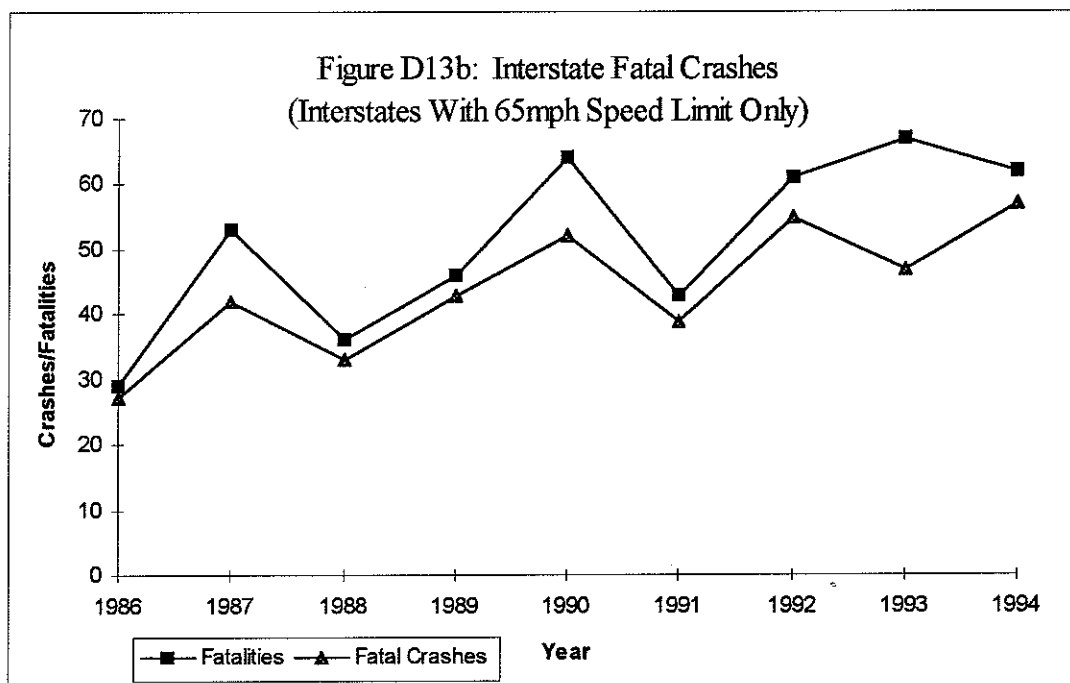

Holidays

- In 1994, the average Crash Rate (Fatal & Injury) per 100 hours was 588.
- In 1994, the average weekend (Friday & Saturday) crash rate per 100 hours was 703.
- Mardi Gars has the highest crash rate among all holidays.
- For the other major holidays the crash rate per 100 hours is below the yearly average.

Crashes and Fatal Crashes per 100 Hours During Holiday Periods						
Four Year Average						
Holiday	CRASHES			DEATHS		
	Ftl & Inj	Alc Inv	% Alc	All	Alc Inv	%Alc
Mardi Gras	618	105	17%	10	6	62%
Memorial Day	529	80	15%	12	7	55%
4th of July	543	99	18%	14	7	51%
Labor Day	537	102	19%	13	4	36%
Thanksgiving	463	80	17%	9	4	43%
Christmas	361	85	24%	11	5	41%
New Years	343	73	21%	13	5	37%
Grand Average	485	89	19%	12	5	46%

Interstates

- The fatal crash rate on interstates increased by 13% from 1993 to 1994 (Table D13).
- The fatal crash rate on interstates with a 65mph speed limit increased by 21% from 1993 to 1994 (Table D13).
- 22% of the fatal crashes on interstates occurred on Saturdays (Fig. D20).
- 31% of the interstate crashes occurred between 1am and 5am (Fig. D21).
- The month of June had the most fatal crashes (12) (Fig. D19).
- Fourteen of the 92 killed on interstates were pedestrians.
- Fifty-seven of the 92 killed on interstates were drivers.

APPENDIX

This Page Intentionally Left Blank.

DEFINITIONS

The following special terms are used throughout the traffic safety community and some may be found throughout this report.

ALCOHOL INVOLVED CRASH (AIC) - Any CRASH in which a DRIVER or PEDESTRIAN had been drinking as indicated by the crash Report .

COLLISION TYPE - The category which best describes the general type of collision which was the first event.

CRASH (TRAFFIC) - An unintended event that causes a death, injury or damage and involves a MOTOR VEHICLE on a TRAFFICWAY. (This book includes only traffic crashes which have resulted in a DEATH or INJURY to one or more persons. CRASHES which have caused only vehicle or Property damage are not included.)

DEATHS (FATALITIES) - Those persons who have died within 30 days of a CRASH as a result of INJURIES sustained in that CRASH.

DRIVER - A person who is in actual physical control of a VEHICLE or who was in control until control was lost. (A PEDALCYCLIST who is in control is considered a DRIVER.)

DRIVER CONDITION - The category which best describes the condition of a DRIVER at the time of the CRASH.

FATAL ACCIDENTS - Those CRASHES in which there was one or more DEATHS.

FATAL AND INJURY (F&I) CRASH - The CRASHES in which there when INJURY or a DEATH.

INJURY - Bodily harm to a person as a result of a CRASH. INJURIES do not include DEATHS.

INTERSECTION CRASHES - Those crashes which occur at or within 100 feet of an intersection.

KILLED - A DEATH as a result of a CRASH.

LIGHT TRUCKS - MOTOR VEHICLES such as pickups, vans, blazers, and panel trucks.

LICENSED DRIVER - A person who is licensed by a state to operate a MOTOR VEHICLE on public roadways.

LOCATION TYPES - Where the CRASH occurred (business, residential, etc.)

DEFINITIONS (CONTINUED)

MISSING OBSERVATIONS - A traffic record had some field not correctly filled out.

MOTOR VEHICLES - Any motorized (mechanically or electrically powered) VEHICLE not operated on rails.

OCCUPANT - A person who is in or on a VEHICLE.

OTHER OBJECT - An object in the roadway which is not part of the roadway (such as rocks, fallen trees, debris).

PASSENGER - Any OCCUPANT of a VEHICLE other than its DRIVER.

PEDALCYCLE - A non-motorized VEHICLE propelled by pedalling such as a bicycle, tricycle, unicycle, or pedalcar. (The PEDALCYCLE is counted as a VEHICLE and the OCCUPANTS are counted as DRIVERS and PASSENGERS.)

PEDESTRIAN - A person who is INJURED or killed in a CRASH and who was not in or on a VEHICLE.

PRIMARY CONTRIBUTING FACTOR - The main cause of a CRASH.

RURAL - All areas that are un-incorporated and incorporated areas with less than 2,500 population - except for Jefferson Parish which is considered all URBAN.

TRAFFICWAY - A land way open to the public as a matter of right or custom for moving persons or property from one place to another. This does not include land ways which are under construction or closed and which have been marked by signs or barriers.

TRUCK COMBINATION - A motor vehicle consisting of a TRUCK TRACTOR which has a trailer or semi-trailer attached.

TRUCK TRACTOR - A motor vehicle consisting primarily of a single motorized device designed for drawing trailers or semitrailers, but not for carrying other property on or in the device. When connected to a trailer or semitrailer, such a device is considered a TRUCK COMBINATION.

URBAN - Any incorporated area with more than 2,500 population and all of Jefferson Parish.

VEHICLE - A device for carrying or transporting persons or things, i.e., cars, trucks, farm equipment, buses, motorcycles, pedalcycles, trains, and recreational vehicles.

VIOLATIONS - The category which best describes the DRIVER'S infringement of MOTOR VEHICLE traffic laws.
